

## **XL PLANTER- #1548**

**Quality Western Red Cedar with Handcrafted Construction**

**Assembly Instructions:** All holes are pre-drilled and screws are included. Check all packing material carefully before discarding as shortages of parts may occur from parts left in packaging. Read instructions carefully before beginning to assemble your XL PLANTER.

**Tools Required for Assembly:** #2 Phillips screwdriver or an electric screwdriver with a #2 Phillips head bit

### **PARTS LIST:**

**2 Long Panels with Legs (Front & Back)**                      **8 – 4 1/2” screws for Box assembly**  
**2 Short Panels (Sides)**  
**10- 1x 4 Slats for Base (Bottom)**

### **ASSEMBLY:**

**NOTE:** This assembly is best executed with two people.

**STEP 1:** Place the 4 Panels upside down on a flat surface in order to form a box  
( See Figure 1 )

**STEP 2:** Screw the 4 Panels together with the 8- 4 1/2” screws in the pre-drilled holes  
**Note:** The 2 Short Side Panels go to the **INSIDE** of the Long Panels.  
**Note:** ALL panels are marked “**BOTTOM**” which will face **INSIDE**.

**STEP 3:** Turn the Planter over so the legs are on the ground.

**STEP 4:** Insert the 10- 1x 4 slats in the bottom of the planter spacing the slats evenly

**Note:** Western Red Cedar contains natural preservatives, so it resists rot, and weathers well. These qualities make cedar ideal for outdoor use. A quality sealer or stain on all areas will delay the graying of the wood and give additional protection. Cedar will weather to a silvery gray if left in its natural state. We would recommend a location for your garden planter that will receive full sun light. Ordinary soil is too heavy for container gardening and we would recommend a light pre-mixed soil.
